4. Make sure that "Client, Farm, Field, Task and Crop Season" boxes are filled out correctly.

5. Press "Equipment" button.

6. Make sure "Machine Type, Machine Model, Machine Name, and Connection Type" are filled out correctly. Some of these boxes might be grayed out. The "Recording Source" box should be grayed out with "AUTO" in it.

7. Press the "Header" button.

8. Make sure that "Implement Type, Implement Model and Implement Name" boxes are filled out correctly. Some of these boxes might be grayed out. Also verify that widths and track spacing are correct. If you need to change widths or spacing, press "Change Widths" box.

9. Press "Document" button.
